

# Hamilton Oshawa Port Supply Chain Visibility Project

## Supply Chain Visibility Projects - Overview

### National Platform

Increase visibility on the transportation network at the regional level to help facilitate **trade**, identify supply chain **efficiencies**, promote **asset utilization**, and identify **infrastructure** requirements.

#### Western

Vancouver  
Lower-  
Mainland

**Objective:**

To increase the efficiency, visibility and predictability of the transportation systems.

Enable network analysis and modelling to support policy and infrastructure decisions

#### Central

GTA

**Objective:**

To Increase the competitiveness of the region through a cooperative data effort focused on the visibility of strategic supply chains

Montreal

**Objective:**

To Identify options to improve the resilience and predictability of the port supply chains.

Great Lakes  
& Seaway

**Objective:**

To increase the efficiency and visibility of the transportation systems and assist TC in the development of their Marine Information System

#### Eastern

Halifax

**Objective:**

Support collaboration and data exchange between the partners to maintain the efficiency and connectivity of the supply chains.

# The data cycle

How data shared for Ontario Supply Chain Visibility projects will benefit Canada
